

# 5 STEPS TO BEAUTIFUL FLOORS

## STEP 1 - STRIP

At some point all good things come to an end. When floors need to be stripped and the finish removed, use a high powered product that will cut through multiple layers of finish & seal, leaving the floor bare and ready for fresh new coats of finish.

**Dyn-A-Max - Mop On Wax & Finish Emulsifier (Gal - Pail)**  
Non-ammoniated, high performance stripping solution. Removes multiple coats quickly. Reduces time, labor, and costs associated with stripping of floor finish.

- Cuts through multiple layers of floor seal/finishes
- Non-ammoniated
- Maximum speed and effectiveness

## STEP 2 - COAT

The second step to beautiful floors is the choice and application of the finish that fits with your floor maintenance procedures. Depending on your procedures, Schilling has the right product for your floors.

**Hard Coat 19 - Floor Finish & Seal (Gal - Pail)**  
Ultimate hardness and appearance. Use in any floor maintenance programs.

- Fast drying & easy to apply
- Superior high gloss
- Resists scuffs and marks
- Seals and finishes

**Reflection 22 - Floor Finish & Seal (Gal - Pail)**  
Higher solids formulation for extra durability and appearance. Excellent for use in low and high speed buffing programs.

- Highest gloss
- Mark resistant
- Easy to apply & fast drying
- Seals and finishes

## STEP 3 - DAILY CLEAN

Protect your beautiful floors with daily cleaning using a neutral pH, no rinse cleaner. Removal of daily soils is the best way to ensure your floors continue to look their best today and everyday.

**Balance EC - Neutral Floor Cleaner (Gal - Pail)**  
Neutral no rinse formulation for rinse free cleaning. Will not damage or soften finishes.

- Crisp lemon scent
- Neutral pH
- Free rinsing

**Marvalosa - Neutral Floor Cleaner (Gal)**  
Safer Choice DfE cleaners. Long lasting lavender scent leaves areas smelling fresh & clean.

- Commercial grade
- Neutral pH
- Rinse free cleaning

## STEP 4 - RESTORE

Periodically, all floors need a lift and a boost using a floor restorer. Spray buffing or burnishing will increase longevity and bring back a brilliant shine to floors.

**Restore 10 - Floor Restorer & Spray Buff (Gal)**  
Concentrated formulation can be diluted for high speed restoration and low speed spray buffing procedures.

- Brilliant gloss
- Mark resistant
- Dilutes for burnishing and spray buff applications

## STEP 5 - RECOAT

Over time, floors will need to be refreshed and recoated. This can be done with two procedures, either Scrub & Recoat or Strip & Remove the finish and rebuild from a bare floor. Scrub & Recoat procedures remove the top 1-2 layers of finish. Additional coats of finish are applied to restore appearance and protection.

**108 Con-Cen-Trate - Floor & All Purpose Cleaner (Gal & Pail)**

- Superior Cleaning
- Removes embedded soils, scuffs, and marks from finished floors
